Details of each column

Title Page

The title should be at first page of 14 font size, bold capitals, followed by the author and co-author(s) name(s) and the institution name and address by indicating suitable superscripts of 10 font size. An asterisk (*) must be placed after the corresponding author name as superscript whose email id, fax, telephone number can be given at the bottom left corner of the title.

Abstract

This should start at next page and should not be more than 150-200 words. The Abstract should briefly explain about the topic, state the scope of the experiments, indicate significant data, and point out major findings and conclusions.

Keywords

Provide three to six appropriate keywords related to the work at the bottom of abstract.

Introduction

The Manuscript should provide a brief introduction of the study which clearly states the hypothesis or purpose statement, how and why the purpose or hypothesis was developed and why the author deems it important.

Materials and Methods

This section contains the materials and instrument(s) used for the experiments and the brief discussion of experimental procedure(s) should be provided.

Results

Results of the experimental data should be clearly presented and tables, figures should be illustrated wherever necessary.

Discussion

This section deals with the interpretation of results, which clearly discuss a critical review of the results in the light of relevant literature. Results and Discussion may be combined.

Conclusion

This section summarizes the main conclusions of the research and a clear explanation of their importance and relevance.

Acknowledgement

Acknowledgement should be brief like giving reference to source of financial support etc.

References

The authors are responsible for the accuracy of the bibliographic information. It must be numbered consecutively in the order that they are cited in the text and designated by superscript with square brackets after the punctuation marks. E.g., ^[X]

A list should be included on separate 1.5 spaced pages at the end of the text. For the proper abbreviations of the journal titles, refer to "Chemical Abstracts". The style and punctuation of the references should confirm to the following examples:

Illustrations and Figures

Figures must be numbered independently of tables, and cited as the relevant point in the manuscript text, e.g. "Fig. 1", "Fig. 2", etc. All figures including photographs should be numbered consecutively in numerals in the order of their appearance in the text and bear a brief title in lower case bold letters below the figure.

REVIEW ARTICLES

Review articles should not be more than 25 pages and contain comprehensive coverage of relevant literature. All format requirements are similar to those applicable to Research papers. Review articles need not to be divided into sections such as Materials and methods; Results and discussion, but should definitely have an abstract, introduction and references.

Copyright

Submission is a representation that the manuscript has not been published previously and is not under consideration for publication elsewhere. Authors would be required to sign a form (to be supplied by the Editor) transferring copyright before the manuscript can be published.

Ethical matter

Authors publishing results from in vivo experiments involving animals or humans should state whether due permission for conduction of these experiments was obtained, from the relevant ethics committees, in the Materials and Methods section. In addition, authors wishing to publish research work involving human studies should also send a notary verified letter of approval from the Ethics Committee or the Institutional Review Board.

The complete manuscript along with covering letter has to be sent as attachment with mail to chiefeditorijapb@gmail.com
